Summary

Full-Stack Software Engineer with **2+ years** of experience across freelance and full-time roles, architecting scalable systems and delivering high-impact business solutions. Specialties include full-stack web architecture and integrating AI-assisted workflows to improve productivity, code quality, and overall delivery speed.

Experience

Software Engineer | *ASR Hospitals (India) Private Limited, Agartala* **Nov 2025 – Apr 2026**

- Built and integrated back-end APIs and front-end UIs for a laboratory management system using **React, Node.js, Express, and PostgreSQL**, ensuring best practices throughout the development lifecycle.
- Refactored the codebase into a structured **MVC architecture** and redesigned the database schema, improving system scalability, maintainability, and performance by **2x**.
- Researched and developed a Laboratory Information System (LIS) by building a Node.js **TCP/IP server** for connecting lab analyzers and automating data synchronization with the database, reducing manual work.

Full-Stack Developer | *ASTU Creatives Agency, Pune* **Aug 2024 – Sep 2025**

- Built and delivered full-stack web applications for multiple clients using the **MERN stack**, handling both front-end and back-end development with a focus on scalability and production-ready systems.
- Integrated **payment systems, AI APIs, real-time features, and Progressive Web App (PWA)** capabilities to enhance overall application functionality and user experience.
- Deployed and maintained applications across **AWS and other cloud platforms**, ensuring reliable performance, scalable infrastructure, and smooth maintenance throughout the lifecycle.

Freelance Developer **Feb 2024 – Aug 2024**

- Designed, developed, and deployed **full-stack** applications for clients, handling front-end, back-end, and production deployment across multiple projects.
- Delivered custom software solutions including **business management systems, billing tools, automation solutions, and AI-powered tools** based on client requirements.
- Built **cross-platform** applications, including Electron desktop apps and Android apps, expanding development beyond web platforms.

Key Projects

Restaurant Management System

- Built a **full-stack** restaurant management system with **order, menu, and billing** features, supporting **multiple roles** (admin, waiter, kitchen) with **real-time updates** across devices using **SSE** over a local network.
- Deployed the application locally using **NSSM** for multi-device access within the restaurant network, currently handling **300+ orders/week** in a live production environment.

Anonify – Anonymous Social Media Platform

- Developed a privacy-focused PWA using **React, TypeScript, Node.js, Express.js, and MongoDB** with secure **JWT + OTP** authentication, dynamic slang word filtering, and an admin panel.
- Integrated **AI-powered grammar correction, emoji suggestions**, and keyword-based trending detection.

Key Certifications

Complete Web Development Course – **Udemy**: Completed 100+ hours of coursework. Built and deployed scalable full-stack applications using the MERN stack, Next.js, Tailwind CSS, PostgreSQL, and Prisma.

Frontend Developer Career Path – **Scrimba**: Completed 80+ hours of interactive coding. Built dynamic, real-world applications focused on accessibility, responsive UI, API integrations, and advanced React.

Skills

Front-End: HTML5, CSS3, JavaScript (ES6+), React, TypeScript, Tailwind CSS, shadcn/ui

Back-End: Node.js, Express, Fastify, SQL, MongoDB, REST APIs, Firebase

Tools & Technologies: Git, Postman, Linux, AI tools, AWS

Relevant Education

Bachelor of Computer Applications (BCA)

DRIEMS University, Tangi, Odisha

Graduated: 2025

CGPA: 8.3 / 10
